

Last year was an exciting and growth packed year! Take a look back at what we accomplished in 2024 as an organization and an industry.

We look forward to what the New Year will bring and celebrating the 25th Anniversary of the IT-ISAC!

COLLABORATION & ENGAGEMENT

- Welcomed **51 new members** in 2024. Our membership spans across five continents and a variety of industries, with each new organization adding another unique and invaluable perspective.
- Published our first **Annual Ransomware Report**, *Exploring the Depths: An In-Depth Analysis of the 2023 Ransomware Landscape and Insights for 2024*. The report highlights data from 2,905 ransomware incidents and received quarterly updates throughout 2024.
- The **Critical SaaS SIG** produced a white paper on the *Shared Responsibility Model and a Holiday Advisory* with tips on how to avoid cyber attacks during the holiday season.
- The **Elections Industry SIG** hosted a successful Tabletop Exercise in June on the topic of Coordinated Vulnerability Disclosure in conjunction with MITRE.
- Launched the new **Data Center SIG** in April with founding members from BAE Systems, Databricks, Equinix, Microsoft, and Oracle.

THOUGHT LEADERSHIP

- Presented on panels and webinars across the nation, including webinars in collaboration with Booz Allen, CISA, and the IT-SCC.
- Spoke at a number of conferences throughout 2024 including RSA, CompTIA ChannelCon, and more.
- From digital to print, we secured **175 media placements throughout the year**.
- Provided thought leadership to policymakers through direct engagement and providing public comments on the:
 - Federal Acquisition Regulation (FAR): Cyber Threat and Incident Reporting and Information Sharing
 - Cyber Incident Reporting for Critical Infrastructure Act (CIRCIA) Reporting Requirements

THREAT INTELLIGENCE SHARING

- Released our new **Predictive Adversary Scoring System (PASS)** tool, which allows members to identify adversaries they should prioritize monitoring based on key factors.
- Increased the Adversary Attack Playbook library to **over 200 playbooks** tracking APT actors, mapped to the MITRE ATT&CK Framework.
- Continued to build on the Ransomware Tracker we started in 2020 with now **8,400+ total ransomware incidents**.
- Distributed **350 curated reports and newsletters** including the Daily Report, Weekly VEAR, Monthly Ransomware Report, and Advisories.
- Hosted **over 200 meetings throughout the year** across our committees and SIGs, including Critical SaaS, Data Centers, Election Industry, Semiconductor, Technical, and more.

Promoted the IT-ISAC and industry knowledge across our social media platforms with **125K+ impressions**.
