IT-ISAC CYBERSECURITY RESEARCHER COMMUNITY PROGRAM

Through the Cybersecurity Researcher Community Program, the IT-ISAC has formed individual, strategic partnerships with Bugcrowd, HackerOne, and Synack that enable IT-ISAC members to leverage the capabilities, talent, and knowledge, of the security researcher community. For more information about these partnerships and other IT-ISAC member benefits, please contact **membership@it-isac.org**.

PARTNERSHIP BENEFITS

bugcrowd	• Partner piece in IT-ISAC newsletter, blog, and podcast • Bugcrowd expert presentations at IT-ISAC meetings on security news and high-profile breaches, and sponsorship of IT-ISAC events • IT-ISAC participation on a Bugcrowd Security Flash webinar
hackerone	• Partner piece in IT-ISAC newsletter, blog, and podcast • HackerOne led workshops or webinars for IT-ISAC members • HackerOne presentations at IT-ISAC meetings and sponsorship of IT-ISAC events • **20%** discount on an annual HackerOne contract
Synack	• Partner piece in IT-ISAC newsletter, blog, and podcast • Synack Vulnerability Intelligence Briefs at IT-ISAC meetings and sponsorship of IT-ISAC events • Development of a framework of effective practices for establishing testing approaches and engaging researchers • **Asset and Vuln Discovery:** This combination of asset discovery and vulnerability assessment is a great entree to get a handle on sensitive assets, where they are, what security controls are in place for them, and learn about actionable vulnerabilities they may have. All vulns are human-triaged and we provide clear, concise steps to reproduce in order to greatly speed remediation. This includes 1 Asset Discovery + 1 Certify (including VDP, Crowdsourced Vulnerability Discovery, SmartScan, and 1 Campaign of Missions). IT-ISAC members receive a **20%** discount on this bundle. • **Cloud Promotion Pack:** This bundle focuses on discovering and assessing cloud assets, but goes deeper by also providing a 1:1 consultation with a Synack Solutions Architect (SA) to help you gain a quick, clear idea where your cloud assets are and where they are vulnerable. This includes 1 SA cloud consultation + 1 Asset discovery + 1 Discover test. If a given asset is host, we add on **20%** additional host coverage for free (300 IPs instead of the usual 250). IT-ISAC members receive a **20%** discount on this bundle.
