## IT-ISAC PARTNERSHIP MEMBER BENEFITS

We understand the importance of partnering with leading companies in the IT space-- which is why we have worked hard to not only grow a trusted network of information sharing but also establish partnerships that offer additional capabilities and resources to our members.

Part of the IT-ISAC's key value is that we supply companies with the resources to maximize their cybersecurity spend. We know training employees and retaining skilled personnel is expensive. That's why we have teamed up with three leaders in IT training and certification: EC-Council, ISACA, and CompTIA (supporting the CompTIA ISAO).

Thanks to our partnership with these highly-respected organizations, our members receive discounts on some of their training and certification programs-- helping companies reduce the cost of valuable training for its employees.
